

Effective, Secure and Reliable Anti-Spam Solutions from Katharion

Katharion provides proven, highly effective, and highly reliable anti-spam and anti-virus solutions to help Internet Service Providers combat the increasing burden of junk email. Featuring rapid deployment and seamless integration with the provider's existing mail infrastructure, Katharion is also extremely simple to use -- freeing time for both administrators and email users.

Effectiveness

In a fraction of a second, Katharion scans incoming messages and leverages numerous technologies to detect spam -- a powerful artificial intelligence Bayesian engine; an extensive heuristic rule set; frequently-updated databases of known spam signatures and virus definitions; blacklists of mail servers, domains, or networks known to be used by spammers; and customizable domain-specific and user-specific whitelists and blacklists.

The result is a dramatic reduction in junk email -- typically upwards of 98% -- relieving a significant burden for email users and system administrators.

Ease of Use

Katharion works with any email server and any email client--web-based, POP3, IMAP, or any combination thereof. Furthermore, customers need not install any hardware or software, nor are there any ongoing maintenance requirements.

Seamless Integration

Katharion's innovative, perimeter-based approach to curtailing viruses and spam means that it can work seamlessly with any email systems in use, offering end users a single sign-on and service providers the opportunity to reinforce existing branding.

“ I am very impressed with the Katharion service. We haven't seen a single false positive. ”

- Mark Chun

Manager of Network Operations, Pacific Internet

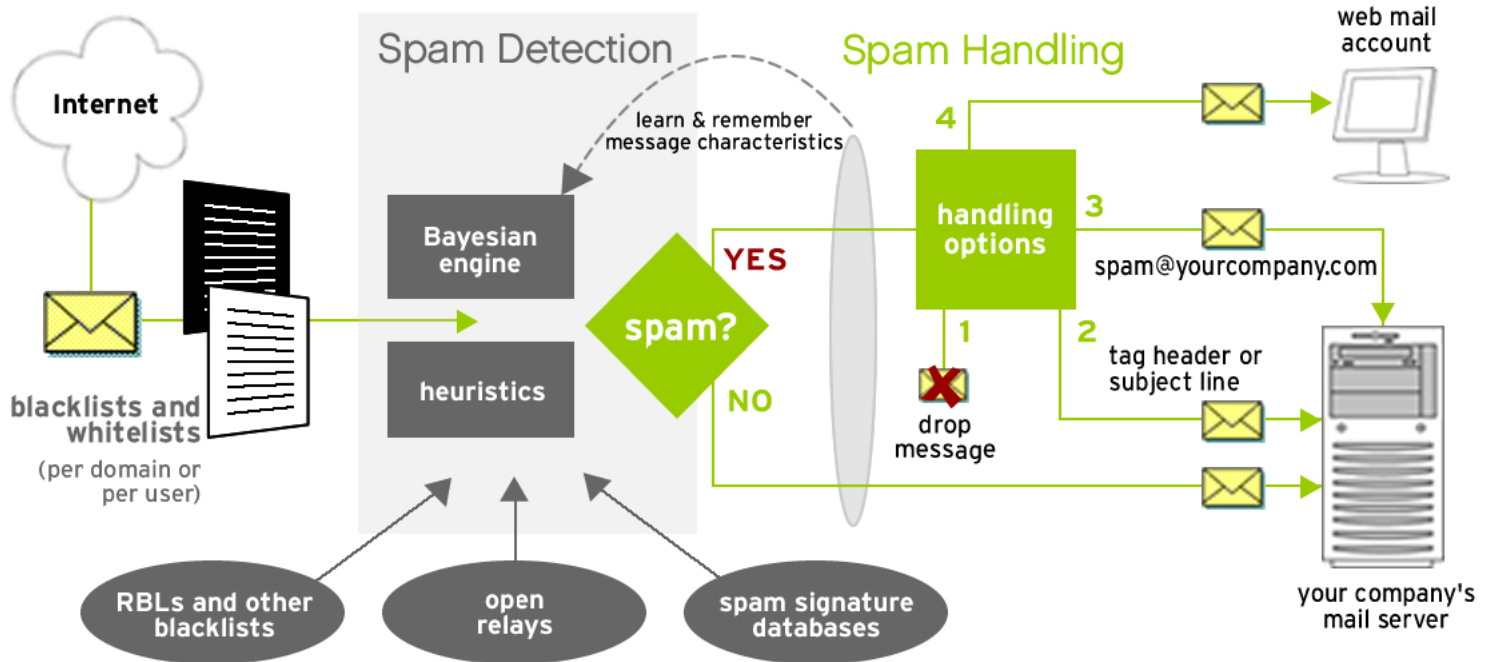

SERVER-BASED SOLUTIONS

APPLIANCE-BASED SOLUTIONS

BENEFIT	SERVER-BASED SOLUTIONS		 PERIMETER-BASED, OUTSOURCED SOLUTION
	SERVER-BASED SOLUTIONS	APPLIANCE-BASED SOLUTIONS	
fully independent of email client in use	✓	✓	✓
can provide both anti-spam and anti-virus capabilities	✓	✓	✓
integrates seamlessly with any existing email infrastructure (single sign-on for end users, etc.)	✓		✓

Katharion Anti-Spam: How It Works

Flexibility

Katharion provides substantial flexibility for handling of detected spam messages, including the ability to delete spam and viruses before they enter the provider's network. Katharion also offers an innovative "one-click whitelisting" capability as well as simple, straightforward web-based administration.

Katharion's high level of flexibility allows companies to minimize or eliminate the need for intervention by end-users and system administrators.

Infrastructure

Katharion is highly reliable, stable, and scalable to meet the needs of the most demanding customers. Featuring fully redundant, premiere data centers in Los Angeles and in Boston, Katharion's systems benefit from multi-homed Gigabit Ethernet connectivity to multiple backbone providers; redundant power served by multiple power grids, combined with emergency diesel generators and sufficient fuel for a full month without re-fueling; multiple continuously online 560KVA Emerson UPS systems; redundant Liebert HVAC units; and a fully redundant software architecture.

Katharion's extremely reliable and secure infrastructure delivers, every time.

Virus Defense

In addition to its anti-spam capabilities, Katharion can protect customers against email-borne viruses. All inbound email and attachments are scanned by Katharion, so viruses can be detected and eliminated before they reach their destination. For providers with an existing anti-virus solution, Katharion adds another layer of anti-virus defense for the organization.
